

Trusted identity verification for public sector

A FedRAMP authorized ID verification solution to prevent fraud and modernize digital access

Unparalleled accuracy & coverage

Socure's platform leverages AI and machine learning to analyze identity data from numerous sources, delivering industry-leading accuracy and inclusivity. It enables government agencies to:

Frictionless access

Auto-approve up to 98% of mainstream populations and 94% of hard-to-identify populations, including Gen Z and new-to-country individuals.

Mitigate risk fast

Detect and mitigate 90% of third-party identity fraud among the riskiest users.

Verify in milliseconds

Automate identity verification with responses in milliseconds, significantly reducing manual reviews.

Secure critical systems

Protect critical public services with comprehensive fraud prevention and risk management.

Who we are

Socure is the leading provider of an AI-driven digital identity verification compliance and fraud prevention. The Socure platform is certified FedRAMP Moderate, meeting the rigorous standards of the Federal Risk and Authorization Management Program (FedRAMP®).

This makes Socure the trusted choice for government adoption, as it delivers secure, efficient, and modern digital identity verification while reducing fraud, waste, and abuse.

What we do

Socure leverages AI and machine learning to analyze identity data from numerous sources, delivering industry-leading accuracy and inclusivity. It enables government agencies to achieve their goals.

Proven public sector impact

Socure is trusted by a wide range of government entities at the federal and state level, including pension systems, state-level digital front doors, Department of Motor Vehicles, licensing agencies, and social service benefits programs across the public sector. Socure is already trusted by 30 state agencies and two federal agencies.

Real-world solutions for government challenges

Socure addresses key challenges faced by public sector agencies, from constituent onboarding to business verification. Our solutions empower agencies to modernize outdated systems and build trust while safeguarding vital services.

Key use cases

Constituent onboarding

Quickly and accurately onboard individuals to government services and benefits with comprehensive identity verification, fraud detection, digital intelligence, and DocV checks, reducing friction for low-risk applicants and dynamically stepping up.

Business onboarding

Verify business information and ownership with comprehensive data services, ensuring interaction with legitimate businesses and business owners.

Trust and safety

Enhance confidence by verifying user identities against industry-leading databases to scrub out fraudulent accounts and maintain system integrity.

Bank account verification

Confirm ownership and status of bank accounts before making changes or approving transactions.

Login and account takeover protection

Detect anomalies and safeguard legitimate user accounts by analyzing behavioral patterns, device signals, and historical identity data during login and account changes.

Why choose Socure?

FedRAMP moderate authorization

Fully compliant with federal security standards, ensuring secure digital identity verification.

Comprehensive fraud prevention

Unparalleled detection powered by AI and machine learning.

Efficient and scalable

Seamlessly handles high transaction volumes with robust security and minimal friction, modernizing digital processes.
